

Take Services Business to the Next Level With Financial Force

IT organizations spend a lot of man hours to give other people visibility on data. An integrated Enterprise Resource Planning (ERP) system can make a world of difference in managing your customer satisfaction. It can also improve overall rates of communication within your customer service departments. However, implementing an ERP system is the most expensive, time-consuming and complicated tasks for an IT department. It also has a high potential for delays and unexpected expenses. Manual processes make the systems error prone. Inaccuracies and extended processing time have a negative impact on customer experience.

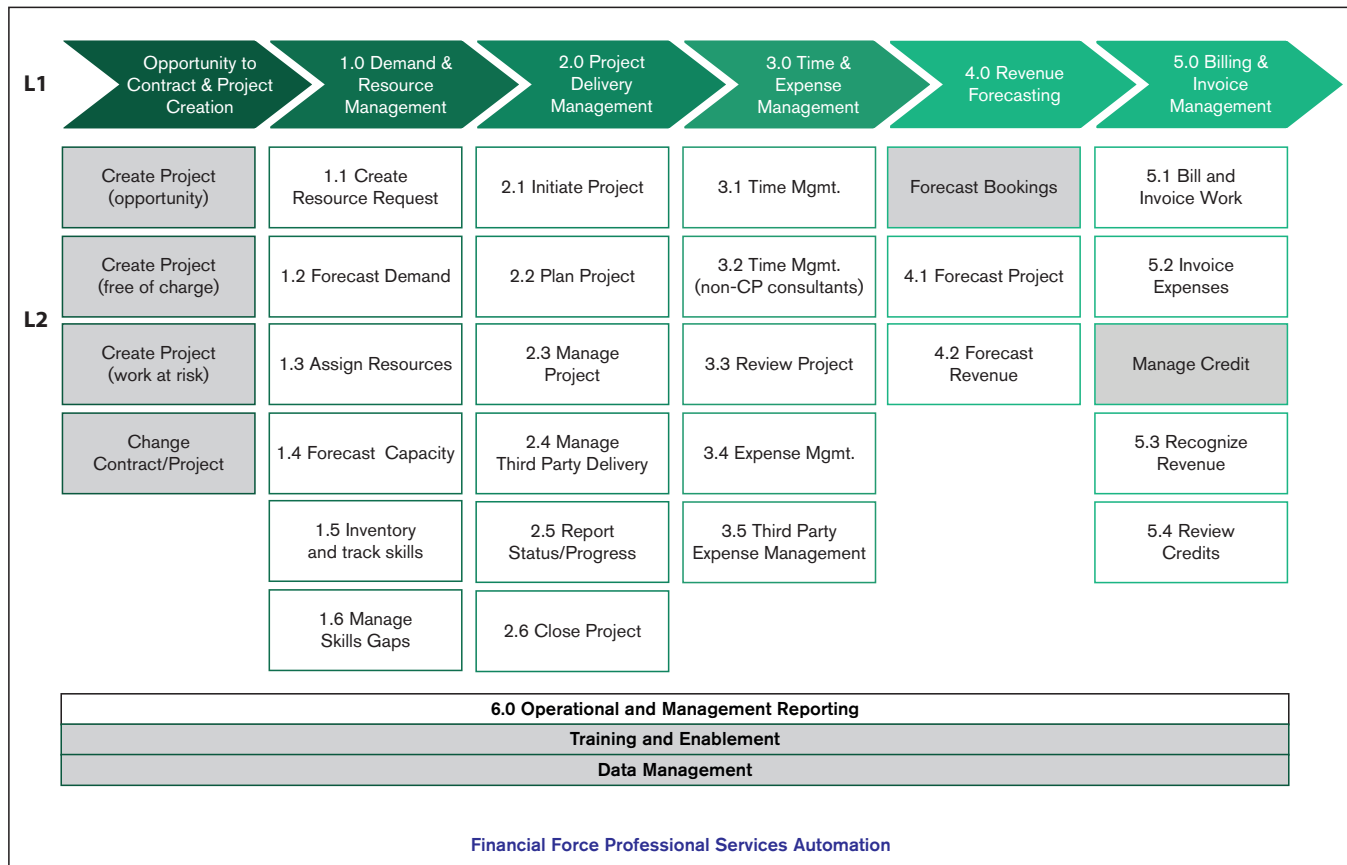

BUSINESS BENEFITS

- Cloud platform for services business
- Reduce IT maintenance costs
- Increase profit through better resource management
- Get visibility of project profitability and margins
- Get customer centric project management
- Opportunity to scale your services business to the next level
