

Syntel Oracle Practice

Syntel's Oracle Practice was formed with a strong focus on Oracle solutions and a vision to impact the way businesses run across the globe. This focus and vision has transformed many of our clients' businesses with high-value enterprise business solutions leveraging our expertise in Oracle Applications, Oracle tools and technologies.

Coupled with deep industry expertise, Syntel's strong capabilities across the Oracle E-Business Suite, PeopleSoft, Siebel, Fusion Middleware and OBIEE help us provide end-to-end Oracle business solutions that instill business agility, operating efficiency and market responsiveness in organizations of any size.

Consulting Services

Syntel's consulting approach is founded on diagnosing our clients' business systems, capturing knowledge from user communities, identifying pain areas, and benchmarking processes against best-in-class organizations before offering a unique solution.

Implementation & Rollout Services

Syntel provides end-to-end implementation and rollout services including process and strategy

- consulting, low-cost technical implementation work, and post-implementation services such as training and knowledge transfer.

Application and Database Upgrade Services

- Syntel helps clients assess and implement upgrades on the basis of complexities, investments, expectations and the benefits of the existing application stability. Syntel's upgrade toolkit ensures the fastest upgrade, keeping downtime to a minimum and ensuring the best return on investments.

SERVICE DELIVERY MODEL

OFFERINGS

Strong Team

- Industry-focused teams in Manufacturing & Automotive, Banking and Financial Services, Insurance, Healthcare and Retail
- 380+ functional and technical experts with experience in Oracle Financials, Distribution, HRMS, Manufacturing and e-commerce Modules
- Extensive experience in providing both "out of the box" and custom solutions
- Experienced in the latest Oracle releases
- Successfully completed multiple implementation and upgrade projects
- Dedicated Centers of Excellence

Strong Experience

- The client was burdened with maintaining, enhancing, operating and integrating multiple legacy mainframe GL systems. Syntel implemented Oracle GL and integrated it to the client's multiple sub-ledger systems.
- Successful upgrade from Oracle 11.5.9 to R12 and implemented Oracle E-Business Tax in place of Vertex – saving the client the cost of a Vertex upgrade
- Upgraded Oracle Applications 11.5.8 to 11.5.10 for a manufacturing client.

Select Customers

- Fortune 50 U.S. Financial Services Company
- One of the world's largest Investment Processors
- Large U.S. Credit Rating Company
- Large Auto Manufacturer

Application Maintenance and Support

Syntel provides application support and maintenance services with flexible timing including 24/7 support. We help clients stabilize current applications and work towards application simplification and optimization by providing permanent fixes to recurring issues. A mature global delivery model and skilled resource pools available at our offshore delivery centers provide the best value and optimum cost structure.
