

Helped a Leading Bank Modernize their Applications and Migrate to Private Cloud

BUSINESS GOALS

Our client wanted to reduce IT infrastructure costs, improve IT resource utilization and staff productivity, and reduce time to market for new offerings.

BUSINESS BENEFITS

Comprehensive and centralized platform providing all reporting services across organization

Shared computing resources deployed on cloud to provide unlimited performance

Better utilization of existing hardware

Minimum change to the existing applications

SYNTEL'S SOLUTION

- Standardized technology and reporting capabilities across applications
- Standardized of development protocols
- Accelerated on-boarding on new reporting applications
- Created reference architecture for the applications to abide
- Key cloud components such as controller, rule engine, and monitoring built in for provisioning/ scale up/scale down
- App framework components built – security, routers, and session management
- Private cloud stack: Linux, Tomcat, JBoss based middleware cloud
- Consolidate apps while migration

About Syntel

Syntel (Nasdaq:SYNT) is a leading global provider of integrated information technology and knowledge process services. Syntel helps global enterprises evolve the core by leveraging automation, scaled agile and cloud platforms to build efficient application development and management, testing and infrastructure solutions. Syntel's digital services enable companies to engage customers, discover new insights through analytics, and create a more connected enterprise through the internet of things. Syntel's "Customer for Life" philosophy builds collaborative partnerships and creates long-term client value by investing in IP, solutions and industry-focused delivery teams with deep domain knowledge.
