

Implemented a Unified BPM/SOA Strategy for a Leading Investment Management Firm

BUSINESS GOALS

Deliver a unified user experience across all applications by automating all investment management functions using BPM and SOA (Service Oriented Architecture) technologies, with a vendor lock-in for any tool.

BUSINESS BENEFITS

Greater business IT alignment

Reusable SOA-based systems

Automated business processes enabled faster change

SYNTEL'S SOLUTION

- Suggested a unified BPM/SOA approach
- Helped the customer choose appropriate tools for UI, BPM and SOA components
- Loosely coupled BPM and SOA platforms to ensure no proprietary features of the BPM tool are used
- RIA toolkit supporting AJAX was selected for a uniform look and feel
- Enabled factory approach to build UIs and services
- Strict adherence to open standards and interoperability
- Standardized technology stack
- Technologies include - Ext-JS RIA Ajax, IBM Lombardi, and WCF services

About Syntel

Syntel (Nasdaq:SYNT) is a leading global provider of integrated information technology and knowledge process services. Syntel helps global enterprises evolve the core by leveraging automation, scaled agile and cloud platforms to build efficient application development and management, testing and infrastructure solutions. Syntel's digital services enable companies to engage customers, discover new insights through analytics, and create a more connected enterprise through the internet of things. Syntel's "Customer for Life" philosophy builds collaborative partnerships and creates long-term client value by investing in IP, solutions and industry-focused delivery teams with deep domain knowledge.
